

# INCREASING ADDED VALUE BY REDUCING COST TRAPS

## YOUR STARTING POSITION

The added value of IT solutions is limited by cost traps such as technical debt, legacy issues, errors and defects as well as knowledge monopolies.

## MORE ADDED VALUE WITHOUT COST TRAPS

Ideally, a company wants to see 100% of the budget invested in the development of IT solutions converted into added value. While a great deal has been optimized in this respect in software development in recent years, studies still show that the actual added value achieved with software solutions that have been in operation for more than 1-2 years is only 20-30%.

The reason for this are cost traps that swallow up 70-80% of the invested budget. Although these traps are known, they are only vaguely visible below the surface and are rarely tackled head-on. They include legacy and technical debt, errors and defects, and knowledge monopolies.

**Reducing these cost traps by 20% would allow a doubling of added value. The good news is that they can be significantly reduced by a managed services approach.**

## OUR SOLUTION

Managed Services allows the increase of added value in software development and significantly reduces cost traps through a professional service delivery organization.

With our flexible and scalable managed service approach ‚adesso SolutionCare‘, we take care of your software solution and continuously reduce cost traps by eliminating knowledge monopolies through a dedicated team, eliminating errors and defects and successively reducing legacy issues and technical debt when developing new releases and patches. And all this in combination with guaranteed service parameters (SLAs) such as service and response times as well as guaranteed availability of necessary capacity. Put your software solution in professional hands and significantly increase the added value of your development.

## ADESSO HAS THE SOLUTION FOR YOU

We deliver a pragmatic, needs-oriented and cost-optimized managed services offering based on the standardized service catalog ‚adesso SolutionCare‘.
