

PLANNING OPTIMIZATION IN LOGISTICS

EFFICIENT DISPOSITION WITH ADOPRE

YOUR BENEFITS

- > Increased operational efficiency
- > Assisted disposition
- > Scalable digitization
- > Rolling obsolescence
- > Identification of potential & synergy

Customers are demanding a growing number of deliveries. Simultaneously, logistics must comply with legal requirements and work efficiently to fulfil „just in time“ orders. With our adopre solution, you'll meet these requirements.

HOW DOES ADOPRE WORK?

With powerful algorithms, our software-as-a-service solution (SaaS), adopre, creates an efficient and balanced scheduling plan for you within minutes, and perfectly meets your company-specific requirements (vehicle preferences, shift changes, etc.). adopre acts as middleware for any transport management system (TMS), providing the interface between drivers, vehicles, dispatchers and transport orders. It can easily be connected to your existing systems and eliminates manual planning work.

WITH PROCESS AUTOMATION, ADOPRE:

- > Reduces scheduling costs by around 80%
- > Optimizes efficiency in accordance with legal requirements (ArG, AZG)
- > Delivers sustainability as early as the planning process
- > Ensures the traceability of disposition statements
- > Provides a basis for predictive maintenance and increased internal performance transparency
- > Reduces licensing costs by up to 50%

FRAMEWORK CONDITIONS INDIVIDUALLY ADAPTABLE TO YOUR COMPANY:

- > Maximum working hours per shift, shift times or weekly working days
- > Driver and vehicle preferences (also per customer order)
- > Determination of individual working days for part-time employees
- > Specification of travel times, attendance times or rest periods
- > Desired degree of utilization of the vehicle fleet, average workshop times or downtimes
- > Creation of requirement profiles for customer orders (difficult loading bays, transport routes), etc.

Our SaaS solution adopre is adaptively configurable and calculates the optimal use of your disposition case.
