

# CONVERT MULTI-SOURCE DATA INTO INSIGHTS

## DATA ANALYTICS AS-A-SERVICE

### YOUR BENEFITS

- > Aggregation of different data sources
- > Real-time data analysis
- > Interactive visualization
- > Easy result export and collaboration
- > Agile pay-as-you-use building blocks
- > Your first prototype with various low-code technologies is quickly available

**Life Science companies generate a lot of data, which is usually spread across different complex data sources. As data processing is still often done manually or semi-automatically, it is incredibly error prone. Therefore, the use of a powerful data analysis tool is crucial.**

### STRUCTURED ANALYSIS AND VISUALIZATION

Data analytics tools enable a structured approach to aggregate, process and visualize data in order to turn it into insights. This is achieved by centralizing the data and thus forming one source of truth which makes the collaboration and exchange of the analysis results smoother.

### YOUR RESULTS

- > Reduction of costs thanks to full integration approach
- > Improvement of data quality due to automated data gathering, analysis and results sharing
- > Reduction of complexity thanks to various visualization possibilities and interactive charts
- > Improvement of user experience

### BUILDING BLOCKS - DATA ANALYTICS APPROACH

These are the four building blocks offered by adesso:

We support you during the complete project cycle or in specific project stages, depending on your needs

REQUIREMENTS  
ENGINEERING  
&  
DATA  
ARCHITECTURE

SOLUTION  
IMPLEMENTATION  
&  
AUTOMATION
