

# DATA PROTECTION COMPLIANT WITH SAP INFORMATION LIFECYCLE MANAGEMENT

## THE LAW

Article 32 of the new law states that personal data must be deleted as soon as it is no longer needed for its original purpose.

Companies risk fines of up to 250,000 Swiss francs if they fail to comply with this provision.

## A RESPONSE TO THE NEW SWISS LAW

*With the introduction of the new Data Protection Act (nDSG) in Switzerland, companies are facing significant challenges. One of the key requirements of the new law concerns the proper storage and deletion of personal data.*

### THE SOLUTION : SAP INFORMATION LIFECYCLE MANAGEMENT

For companies, especially those with large data sets, complying with these requirements can be an extremely complex and challenging task. This is where SAP Information Lifecycle Management (ILM) comes in. With ILM, companies can control the lifecycle of data - from creation to deletion. ILM provides tools to determine when and how data is deleted, facilitating compliance with nDSG data retention regulations.

### OPTIMIZATION OF YOUR EXISTING SOLUTION BY ADESSO

adesso adesso draws on many years of experience and expertise to support you, not only in the implementation of SAP ILM, but in the optimization of your existing ILM systems to ensure compliance with the nDSG. Our team of experts can conduct a thorough review of your current ILM system to determine if it meets the requirements of the nDSG.

In addition, we can make recommendations on how to make your existing ILM application more efficient and accurate. We not only make conceptual recommendations by considering your entire business architecture, but we also take over its implementation. In this way, we help you End2End to find a sustainable, effective strategy for data lifecycle management.

### OUR PROMISE

We ensure that your company complies with data privacy regulations, optimizes processes, and builds trust with your customers.
